Proven ability to combine technical execution with psychology-based marketing strategies to drive business growth. Experienced in building web applications from scratch, designing system architectures, and executing data-driven digital marketing campaigns.

TECHNICAL & MARKETING SKILLS

- **Web Development:** React.js, Node.js, Express.js, REST APIs, Python
- **Database & DevOps:** PostgreSQL (SQL), Docker, Linux System Administration, Bash Scripting
- **Digital Marketing:** SEO, Google Analytics, Lead Generation, Social Media Management, Meta Business Suite
- **Design & Content:** Adobe Photoshop, Video Scripting, Promotional Banner Design
- **Soft Skills:** Analytical Thinking, Problem Solving, Adaptability, Client Relationship Management

PROFESSIONAL EXPERIENCE

Digital Marketing Specialist

In Action Media Agency | Oct 2025 – Jan 2026

- Managed comprehensive digital marketing campaigns and analyzed performance data using Meta Business Suite to optimize reach and engagement.
- Authored short-form video scripts and designed promotional marketing banners using Adobe Photoshop to boost audience engagement across managed pages, including "3atlann" and "Roadside Heroes".
- Implemented psychology-based marketing strategies to increase brand awareness and lead generation.

Real Estate Sales Specialist

X Property | May 2025 – Sep 2025

- Executed real estate sales strategies and managed client relationships to drive property acquisitions.
- Communicated complex property details to potential buyers, resulting in increased client trust and successful deal closures.

B2B Technical Support Representative

Ison Experience (Vodafone Egypt) | Mar 2025 – May 2025

- Provided advanced technical support and troubleshooting for corporate accounts and authorized signatories.
- Ensured rapid resolution of technical bottlenecks and service interruptions, maintaining high levels of client satisfaction.

PROJECTS & FREELANCE WORK

Full-Stack Web Developer (Freelance)

Fursat Safar | 2025

- Developed and launched the official company website (www.fursatsafar.com) from scratch utilizing React.js and Node.js.
- Integrated scalable backend solutions and managed lead generation functionalities to support the business's online presence.

Custom ERP System Architecture

Personal Project | 2026

- Designed a multi-tiered architecture for a custom Enterprise Resource Planning (ERP) system.
- Deployed database schemas and containerized environments utilizing Python, PostgreSQL, and Docker for both local and cloud hosting.

Automated Reconnaissance Script

Cybersecurity & System Administration Project | 2026

- Developed a Bash shell script (recon.sh) to automate the aggregation of vulnerability scanning and subdomain enumeration results.
- Leveraged Linux-based tools (Subfinder, Assetfinder, httpx) within a Kali Linux environment to streamline security workflows.

EDUCATION

Bachelor of Arts in Psychology

Ain Shams University, Cairo, Egypt
